

appendix-dataset.dta

STATA dta.file with all the data used in the paper “Multinational Production: Data and Stylized Facts” by Ramondo, Rodriguez-Clare, and Tintelnot.

Variables related to multinational production (sales_raw, num_aff_raw, stocks, num_aff_MandA, sales_MandA, and sales_stocks) are explained in the online appendix that documents those data.

ISO_d: country code for destination

ISO_o: country code for origin

gross_prod_nonfin_d: gross production in non-financial sectors, in destination country, avg. 1996-2001. Source: see online appendix.

gdp_d: GDP in current US dollars, avg. 1996-2001. Source: World Development Indicators

rgdpl_d: real GDP per capita (PPP-adjusted), avg. 1996-2001. Source: Penn World Tables, 8.1

absorption_d: constructed as gross production minus imports plus exports in destination country, avg. 1996-2001.

trade_goods: value of trade in all goods, avg. 1996-2001. Source: Feenstra et al.

From CEPII:

cborder: dummy equals one if country of origin and destination share border

colony: dummy equals one if country of origin and destination have colonial ties

clanguage: dummy equals one if country of origin and destination share language

distance: geographical bilateral distance in km

replication-file.do

STATA do.file that provides the codes to replicate all the results in the paper.
